📍 Kuchaman City, Rajasthan, India

## EXPERIENCE

### X.COM / TWITTER CLONE
*Website Clone*

I've developed a Twitter clone using JavaScript framework React for the front end and Node.js with MongoDB Database for the back end. The main objective was to enhance my skills in authentication, security, user management, images uploading, etc.

Throughout the process, I acquired skills in utilizing JWT Tokens for authentication, Google Login Authentication, implementing password hashing with salt for enhanced security, incorporating email functionalities, and integrating web sockets, etc.

### ECOMMERCE WEBSITE
*Product store*

I developed an e-commerce website using Next.js, where data was obtained from my MongoDB database. Next.js was employed for both backend and frontend tasks. The primary objective of this project was to gain a deep understanding of the Next.js framework in JavaScript. Throughout the process, I acquired skills in multi-user management, multi-cart management, and multi-project management.

## EDUCATION

2021-2024    **Bachelor Of Computer Application**
Maharshi Dayanand Saraswati University, Ajmer
